

Business Integrated Governance

Commercial Partners

Deepteam

BIG CIC Commercial Partner

Deepteam is a network of associates delivering high-quality capability across Governance, Strategy, Portfolio, Programme, Product and Project Management. We use the BIG Lifecycle to understand a client situation, expectations and constraints, while sharing expertise with clients to shape change. Our 'Build Enablers' activity provides the central capability underpinning integrated governance, and includes design / build of business support, information technology, governance framework and accountability maps leveraging partners and client capability. Our 'Culture Change' activity provide adoption and sustainment expertise. **Contact us to discuss your current situation.**

Partner Focus - Components

Partner Focus – Lifecycle

Partner - High-Level Services Definition

We have 6 services to help in Early Engagement:

First Steps work is to identify key stakeholders, key drivers and vision of the overall possibility. **Readiness Assessment** provides an online form to probe areas for readiness.

Discovery is to understand in more detail the current state and possibility.

Workshop conveys the overall concept to sponsors and change delivery leaders.

Roadmap enables the discussion of component contents, priority and sequence for change

Planning and Business Case supports with next steps and overall planning.
See the sub-menus for further details.

Building Enablers involves getting core readiness activity completed. 'Building Enablers' activity provides the central capabilities underpinning integrated governance, and includes design / build of business support, information technology, governance framework and accountability maps. This is where other core processes and roles may also be reviewed and improved as necessary. The nature and scale of needs will be understood after first steps.

Culture Change As capabilities are made ready, adoption and sustainment need to begin. Sensitivity and skill is needed to 'change the way we work around here' where necessary. Making change stick and sustainable needs adoption readiness, adoption support, training and sustainment (support) planning. The nature and scale of needs will be understood after first steps.
